

ANNUAL MAINTENANCE CONTRACT

Your Medical Gas Systems should be inspected regularly. They are very critical to the patients well being. These inspection can make the difference between financial gain or failure. It is very important the facility should be under regular, maintenance and operational information to keep your medical gas systems safe and cost-effective. periodic inspections are also required for the in tests and out tests, the alarm warning system and maintenance programs for all central supply systems. Adhering to proper maintenance standards will allow your facility to avoid unnecessary risks and delays. Moreover, understanding the types of gases you are using and how to use them properly will maintain top patient safety. Knowing the various types of gases and compressors and understanding their maintenance requirements is critical for facility managers and others staff.
